Hi Amanda,

Could you please share that fact sheet?

Thanks!

Yes, please add the following Navajo hotline numbers: 505-371-8415 and 505-371-8408.

The language we used on the factsheet is (in consultation with Navajo Nation): "The Navajo Nation Emergency Operations Center maintains a contact number for community members' questions and requests. To contact the Navajo Nation directly, please call 505-371-8415 or 505-371-8408."

Thanks,

Amanda

Please check out the website. We added all your recommended links below the Hot Line number. We have Ute info listed. Do you have a Navajo hotline number to add?

Jennifer

Hi all,

We were planning to reach out to talk about having a link on the main EPA Gold King website to a R9 specific outreach website, since we'll need to add a lot of information and it will be changing rapidly (such as livestock and agriculture water locations, etc.). I plan to reach out today about getting that link set up and getting the R9 specific website up and running more.

Best,
Amanda

Hi Amanda and Joan,

I wanted to let you know that I've talked to HQ about posting some region-specific resources to the EPA Gold King Mine website and they are happy to do so. Attached is what I have so far for R8. I'm going to check with our local partners and then the JIC/Legal, etc., but maybe we can start directing more folks to the website, or at least have things posted for ourselves to refer to.

Rebecca,

Our contacts at the call center have been Chris & Jose. Here's their number: 888-611-2782

José L. Ojeda

Senior Project Leader – START Team

Weston Solutions, Inc.

I should note that in theory we could receive a call in the Navajo language on this number. In this case, please put as much information into the log as possible and note that the message is in Navajo, so that we can get one of our interpreters on the phone with us when we call back.

Thanks!

Amanda

Hi,

I'd like to pitch the idea of using SharePoint to update the Call Log. It would enable us all to see the latest "real time" updates to the excel document and eliminate the need for different versions. Just added the latest document that was sent to this SharePoint site under the CALL LOG tab. Feel free to call me with any questions.
